Professional Summary

MCA graduate with software development internship experience and hands-on experience in Java, Spring Boot, React.js, REST APIs, databases, API testing, debugging, and Git-based development workflows. Experienced in building backend and full-stack applications, implementing authentication and role-based access control, validating REST APIs using Postman, and working with MySQL and MongoDB. Seeking opportunities in software development, application development, software testing, and QA.

Technical Skills

Languages: Java, JavaScript

Frontend: HTML, CSS, React.js

Backend: Spring Boot, REST APIs, JPA/Hibernate, MVC, Maven

Ai/Automation: AI-assisted development

Databases: MySQL, MongoDB

Testing & Debugging: Postman, REST API Testing, API Validation, Debugging

Security: JWT Authentication, Role-Based Access Control (RBAC)

Tools: Git, GitHub

Experience

Calypso Innovation, Mangalore

Mar 2025 – Jun 2025

Software Developer Intern (Onsite)

- Built a real-time team communication platform using Next.js and Convex (BaaS), implementing workspace creation, channel-based messaging, and collaborative communication features.
- Developed serverless backend functions with real-time data synchronization, enabling low-latency messaging and seamless user interactions.
- Designed and integrated secure user authentication and role-based access control (RBAC) to protect workspace access and user data.
- Collaborated with developers using Git-based workflows, contributing to feature implementation, debugging, testing, and agile development practices.

Projects

Event Management System – Backend

GitHub

- Developed a scalable backend application using Java, Spring Boot, MySQL, JPA/Hibernate, and Maven, implementing 10+ RESTful APIs for event creation, booking, scheduling, and reservation management.
- Implemented JWT-based authentication and Role-Based Access Control (RBAC) to secure endpoints and manage user permissions.
- Followed MVC architecture with clear separation of controller, service, and repository layers, improving maintainability and scalability.
- Integrated Spring Data JPA for database operations and validated APIs using Postman to ensure reliability and data integrity.

Real Estate Management System

GitHub

- Built a responsive full-stack real estate platform using MongoDB, Express.js, React.js, Node.js, and Tailwind CSS.
- Developed features including property listings, wishlisting, reservations, user authentication, dashboard navigation, and admin management.
- Designed RESTful APIs for property management and reservation workflows, ensuring smooth frontend-backend communication.
- Categorized and managed 5+ property types with filtering and search functionality, enhancing property discovery and user experience.

Education

St Aloysius College (Deemed to be University), Mangalore

Oct 2023 – Jul 2025

Master of Computer Applications (MCA)

CGPA: 7.51 / 10

Relevant Coursework: Object-Oriented Programming, Database Management Systems, Web Development, Computer Networks, Internet of Things

Certifications

- Java Backend Development with AI – GeeksforGeeks (Classroom Program)
- JavaScript – Udemy
- Microsoft SQL Server – Infosys Springboard
- Python Programming – Udemy
